

Mixed Operations with Brackets

Name: _____ Class: _____

Calculate each of the following

$$14 \times (200 - 170) =$$

$$(345 - 187) \times 27 =$$

$$1,089 \div (34 + 87) =$$

$$(674 + 822) \div 17 =$$

$$23 \times (456 - 169) =$$

$$(786 - 433) \times 19 =$$

$$3,807 \div (25 + 22) =$$

$$(961 + 599) \div 24 =$$

$$(198 - 104) \times 83 =$$

$$3,397 \div (12 + 67) =$$

$$(910 - 776) \times 25 =$$

$$2,340 \div (17 + 28) =$$

$$(843 + 123) \div 14 =$$

$$19 \times (500 - 322) =$$

$$(185 - 113) \times 57 =$$

$$2,640 \div (21 + 23) =$$

$$(555 + 759) \div 18 =$$

$$(403 - 282) \times 35 =$$

$$2,640 \div (17 + 31) =$$

Answers

Calculate each of the following

$$14 \times (200 - 170) = 420$$

$$(345 - 187) \times 27 = 4,266$$

$$1,089 \div (34 + 87) = 9$$

$$(674 + 822) \div 17 = 88$$

$$23 \times (456 - 169) = 6,601$$

$$(786 - 433) \times 19 = 6,707$$

$$3,807 \div (25 + 22) = 81$$

$$(961 + 599) \div 24 = 65$$

$$(198 - 104) \times 83 = 7,802$$

$$3,397 \div (12 + 67) = 43$$

$$(910 - 776) \times 25 = 3,350$$

$$2,340 \div (17 + 28) = 52$$

$$(843 + 123) \div 14 = 69$$

$$19 \times (500 - 322) = 3,382$$

$$(185 - 113) \times 57 = 4,104$$

$$2,640 \div (21 + 23) = 60$$

$$(555 + 759) \div 18 = 73$$

$$(403 - 282) \times 35 = 4,235$$

$$2,640 \div (17 + 31) = 55$$
